About Me

Hi! My name is Raul Calin Savin, I am a Web Developer and I'm very passionate and dedicated to my work. With 2+ years of experience, I have acquired the skills and knowledge necessary to make projects I work on, successful. Ongoing training in the programming field is one of my top goals to get more experienced and deliver better results. I have a few hobbies, but mostly I like to travel.

Programing Experience

2017 - 2018

Reading, UK

- Learning the basics of programming from different sources like Codecademy, freeCodeCamp & Udemy

2018 - Present

Reading, UK

- Building websites ever since.

2019

Finished projects: Live Currency

- Link: <https://live-currency-and-convertor-v2.herokuapp.com/>
- This website provides Today's currency exchange rates from all over the world.
- One can convert any amount of money from one foreign currency to another with one click of a button.
- Language/Tools/Technologies:
 - ReactJs - Javascript - Redux - Styled-components - React-world-flags - Axios - Validator

2019

Protein Tracker

- Link: <https://my-macro-calculator-v2.herokuapp.com>
- This site helps the customer lose weight, bulk up or maintain a healthy lifestyle by tracking his/her caloric intake quickly and easily.
- One can calculate or set his/her daily target food intake.
- The site has a database, an authentication system, the user can administrate his own page adding or removing products, editing existing ones, etc.
- Language/Tools/Technologies:
 - ReactJs - Javascript - Redux - Bootstrap - Axios - Validator
 - NodeJs - Express - Mongoose - Jsonwebtoken - Bcryptjs

2019

Face-Recognition

- Link: <https://ai-face-recognition.netlify.com/>
- The application allows a person to drag and drop a photo and the app detects the face or faces in it.
- Language/Tools/Technologies:
 - Gatsby - ReactJs - Javascript - React-dropzone - Clarifai

For more finalized projects see my portfolio at <https://savin-raul.netlify.com/>

- STYLED COMPONENTS
- GITHUB

2019-2020

Websites under construction:

- Event-Me (This website lets the user create events that can be attended by other people. The website has an authentication system, user profile management, event joining/leaving/discussion, event management, etc.)
- Coffee Shop (A CMS website that allows anyone to buy products via STRIPE.)
